

## **ACDELCO (4)**

### **1 Module CAT OFF ACDELCO E37/38/39/67/78/83**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units ACDELCO E37/38/39/67/78/83 in GM (Opel, Chevrolet and etc.) vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **2 Module EVAP OFF ACDELCO E37/38/39/67/78/83**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units ACDELCO E37/38/39/67/78/83 in GM (Opel, Chevrolet and etc.) vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **3 Module EGR OFF ACDELCO E37/38/39/67/78/83**

This module is designed to disable EGR valve monitoring (Exhaust Gas Recirculation) from engine control units ACDELCO E37/38/39/67/78/83 in GM (Opel, Chevrolet and etc.) vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **4 Module DTC OFF ACDELCO E37/38/39/67/78/83**

This module is designed to remove any DTC from engine control units ACDELCO E37/38/39/67/78/83 GM in (Opel, Chevrolet and etc.) vehicles. This module modifies the read file (full), without the checksum recalculated. All users follow up updates and technical support for free!

## **BMW (3)**

### **5 Module CAT OFF MSV(D)70/80/81/85/87/90 BMW**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units MSD80 (SIEMENS), MSD81 (SIEMENS), MSD81.2 (SIEMENS), MSD85 (SIEMENS), MSD87 (CONTINENTAL), MSV70 (SIEMENS), MSV80 (SIEMENS), MSV90 (SIEMENS) in BMW vehicles. This module modifies the read files (full or calibrating), with the checksum recalculated. All users follow up updates and technical support for free!

### **6 Module EVAP OFF MSV(D)70/80/81/85/87/90 BMW**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units MSD80 (SIEMENS), MSD81 (SIEMENS), MSD81.2 (SIEMENS), MSD85 (SIEMENS), MSD87 (CONTINENTAL), MSV70 (SIEMENS), MSV80 (SIEMENS), MSV90 (SIEMENS) in BMW vehicles. This module modifies the read file (full or calibrating), with the checksum recalculated. All users follow up updates and technical support for free!

## **7 Module DTC OFF MSV(D)70/80/81/85/87/90 BMW**

This module is designed to remove any DTC from engine control units MSD80 (SIEMENS), MSD81 (SIEMENS), MSD81.2 (SIEMENS), MSD85 (SIEMENS), MSD87 (CONTINENTAL), MSV70 (SIEMENS), MSV80 (SIEMENS), MSV90 (SIEMENS) in BMW vehicles. This module modifies the read file (full or calibrating), with the checksum recalculated. All users follow up updates and technical support for free!

---

## **BOSCH EDC16 (1)**

### **8 Module BOSCH EDC16**

The BOSCH EDC16 module is designed for editing the files of the BOSCH EDC16 in any vehicle regardless of the brand. The following functions are supported:

1. DTC OFF — delete DTC error control by number
2. DPF OFF — removing the particulate filter control
3. EGR OFF — removing the EGR valve control
4. VSA OFF — removing the control of the vortex dampers FLAPS

This module works with both full version of the files and with calibrations. The module modifies the files of the MPC processor, without recalculating the checksum.

All users follow up updates and technical support for free!

To get information about the supported firmware please [write us an email](#).

---

## **BOSCH EDC17 / MED17 (8)**

### **9 Module BOSCH EDC17**

The BOSCH EDC17 module is designed for editing the files of the BOSCH EDC17 in any vehicle regardless of the brand. The following functions are supported:

1. DTC OFF — delete DTC error control by number
2. DPF OFF — removing the particulate filter control (excluding Mercedes)
3. EGR OFF — removing the EGR valve control
4. VSA OFF — removing the control of the vortex dampers FLAPS
5. IMMO OFF — delete the immobilizer function

This module works with both full version of the file and with calibrations. The module modifies the files of the TRICORE processor, without recalculating the checksum. All users follow up updates and technical support for free!

At the moment, MED17 and EDC17 modules support more than 4700 files, this list is constantly updated. To get information about the supported files please [write us an email](#).

## **10 Module BOSCH MED17**

The BOSCH MED17 module is designed for editing the firmwares of the engine control units (ECU) of MED17 of any car make. The following functions are supported:

1. DTC OFF — delete DTC error control by number
2. CAT OFF — removal of catalyst control (transfer to EURO-2)
3. VSA OFF — Remove the control of the vortex dampers FLAPS
4. EVAP OFF — Remove the EVAPORATIVE EMISSION
5. IMMO OFF — delete the immobilizer function

This module works with both full version of the files and with calibrations. The module corrects the files of the TRICORE processor, without recalculating the checksum. All users follow up updates and technical support for free!

At the moment, MED17 and EDC17 modules support more than 4200 files, this list is constantly updated. To get information about the supported files please [write us an email](#).

## **11 Module BOSCH EDC17 ADBLUE OFF MERCEDES**

The BOSCH EDC17 module is designed to disable AdBlue on Mercedes vehicles. This module works with both full version of the files and with calibrations. The module modifies the files of the TRICORE processor, without recalculating the checksum. All users follow up updates and technical support for free!

## **12 Module BOSCH EDC17 DPF OFF MERCEDES**

The BOSCH EDC17 module is designed to disable DPF on Mercedes vehicles (ECU - EDC17CP57, EDC17CP46, EDC17CP10, EDC17C66, EDC17CP01). This module works with both full version of the files and with calibrations. The module modifies the files of the TRICORE processor, without recalculating the checksum. All users follow up updates and technical support for free!

## **13 Module BOSCH MED17.7.X CAT OFF MERCEDES**

The BOSCH MB MED17.7.X CAT OFF module is designed to disable catalyst on Mercedes vehicles (ECU - MED17.7.1, MED17.7.2, MED17.7.3). This module works with both full version of the file and with calibrations. The module modifies the files of the TRICORE processor, without recalculating the checksum. All users follow up updates and technical support for free!

## **14 Module BOSCH MED17.7.X EVAP OFF MERCEDES**

The BOSCH MB MED17.7.X EVAP OFF module is designed to disable EVAP on Mercedes vehicles (ECU - MED17.7.1, MED17.7.2, MED17.7.3). This module works with both full version of the files and with calibrations. The module modifies the files of the TRICORE processor, without recalculating the checksum. All users follow up updates and technical support for free!

## **15 Module BOSCH MED17.7.X VSA OFF MERCEDES**

The BOSCH MB MED17.7.X VSA OFF module is designed to disable VSA on Mercedes vehicles (ECU - MED17.7.1, MED17.7.2, MED17.7.3). This module works with both full version of the files and with calibrations. The module modifies the files of the TRICORE processor, without recalculating the checksum. All users follow up updates and technical support for free!

---

## **16 Module BOSCH MED17.7.X DTC OFF MERCEDES**

The BOSCH MB MED17.7.X DTC OFF module is designed to disable DTC on Mercedes vehicles (ECU - MED17.7.1, MED17.7.2, MED17.7.3). This module works with both full version of the file and with calibrations. The module modifies the files of the TRICORE processor, without recalculating the checksum. All users follow up updates and technical support for free!

---

## **BOSCH MEDC17 EEPROM EDITOR (1)**

### **17 BOSCH MEDC17 EEPROM EDITOR**Item no.:12S1/01

The program BOSCH MEDC17 EEPROM EDITOR is designed for editing information and functions in EEPROM of EDC17, MED17, PCR2.1, BCM2 Audi, Passat CCM.

#### **1. Module MED17 / EDC17**

- Supports ECU with immobilizer version up to 6+
- Editing of all immobilizer data located in the EEPROM
- Ability to turn off the immobilizer and change the status of the ECU for the immobilizer 4
- Export and import of data, including from other units (for example, the Passat CCM comfort unit)
- Cloning of the ECU for the immobilizer 4, 5, 6+ (under testing)
- Import of immobilizer data (version 4) from data files of third-party programs: VVDI, SMOK, CARPROG

#### **2. Module PCR2.1**

- Editing of all immobilizer data located in the EEPROM
- Export and import of data, including from other units (for example, the Passat CCM comfort unit)
- Cloning of the ECU
- Import of immobilizer data from data files of third-party programs: VVDI, SMOK, CARPROG

#### **3. Module BCM2 Audi**

- Support for ECM BCM2.01, BCM2 1.1, BCM2 2.0
- Data editing: VIN, ECU CS, GearBox CS, ELV CS, PowerClass, Keys
- Export and import of data, including from other ECU (for example MED17)
- Cloning of the ECU (under testing)

#### **4. Module Passat CCM**

- Data editing: VIN, Immo ID, CS, PIN, MAC CCM, MAC ECU, MAC ELV, PowerClass, Keys
- Possibility to change the status of the computer
- Export and import of data, including from other ECU (for example MED17)
- Cloning of the ECU

**Please note:** The program requires a special dongle. It comes with the module and requires shipment. If you are buying this program only, there is NO NEED for the common S&V Edit dongle.

---

---

## **CHEVROLET (6)**

### **18 Module Immo OFF Delphi MT80 Chevrolet Aveo**

This module is designed to remove immobilizer data from engine control units Delphi MT80 in Chevrolet Aveo vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **19 Module CAT OFF DELPHI MT80 Chevrolet**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units DELPHI MT80 in Chevrolet vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **20 Module EVAP OFF DELPHI MT80 Chevrolet**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units DELPHI MT80 in Chevrolet vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **21 Module EGR OFF DELPHI MT80 Chevrolet**

This module is designed to disable EGR valve monitoring (Exhaust Gas Recirculation) from engine control units DELPHI MT80 in Chevrolet vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **22 Module DTC OFF DELPHI MT80 Chevrolet**

This module is designed to remove any DTC from engine control units DELPHI MT80 in Chevrolet vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **23 Module AVEO MT80 PATCH P0315 CHEROLET**

This module is designed to remove DTC P0315 from engine control units DELPHI MT80 Aveo in Chevrolet vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

---

---

## **CHINA (1)**

### **24 Module Immo OFF ME7.9.7(1)/7.8.8/M7.8 M7.9.7/M7.9.7+ CHINA**

This module is designed to remove immobilizer data from engine control units ME7.9.7 (1)/7.8.8/M7.8 M7.9.7/M7.9.7+, installed in Chinese vehicles such as — Chery Fora, Chery Tiggo, Chery QQ6, Amulet and others. This module modifies the full version of the files, with the conversion of the checksum. All users follow up updates and technical support for free!

---

## **FCA Group (4)**

### **25 Module CAT OFF NGC3 MPC565 NGC4 MPC5554**

#### **Chrysler/Dodge/Jeep/Fiat**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units NGC3 MPC565 and NGC4 MPC5554 in Chrysler/Dodge/Jeep/Fiat vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **26 Module EGR OFF NGC3 MPC565 NGC4 MPC5554**

#### **Chrysler/Dodge/Jeep/Fiat**

This module is designed to disable EGR valve monitoring (Exhaust Gas Recirculation) from engine control units NGC3 MPC565 and NGC4 MPC5554 in Chrysler/Dodge/Jeep/Fiat vehicles. This module modifies the read file (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **27 Module EVAP OFF NGC3 MPC565 NGC4 MPC5554**

#### **Chrysler/Dodge/Jeep/Fiat**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units NGC3 MPC565 and NGC4 MPC5554 in Chrysler/Dodge/Jeep/Fiat vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

---

## **28 Module DTC OFF NGC3 MPC565 NGC4 MPC5554**

### **Chrysler/Dodge/Jeep/Fiat**

This module is designed to remove any DTC from engine control units NGC3 MPC565 and NGC4 MPC5554 in Chrysler/Dodge/Jeep/Fiat vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

---

## **FORD (22)**

### **29 Module CAT OFF CONTINENTAL EMS24xx 4MB FORD**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units CONTINENTAL EMS24xx size 4MB in Ford vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **30 Module EVAP OFF MEDG17 4 MB FORD**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units MEDG17 size 4 MB Ford cars. This module corrects the read firmware (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **31 Module DTC OFF MEDG17 4 MB FORD**

This module is designed to remove any DTC from engine control units MEDG17 size 4 MB in Ford vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **32 Module CAT OFF MEDG17 4 MB FORD**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units MEDG17 size 4 MB in Ford vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **33 Module EVAP OFF MEDG17 2 MB FORD**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units MEDG17 size 2 MB Ford cars. This module corrects the read firmware (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **34 Module DTC OFF MEDG17 2 MB FORD**

This module is designed to remove any DTC from engine control units MEDG17 size 2 MB in Ford vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

---

### **35 Module CAT OFF MEDG17 2 MB FORD**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units MEDG17 size 2 MB in Ford vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **36 Module EVAP OFF CONTINENTAL EMS24xx 4MB FORD**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units CONTINENTAL EMS24xx size 4 MB in Ford vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **37 Module DTC OFF CONTINENTAL EMS24xx 4MB FORD**

This module is designed to remove any DTC from CONTINENTAL EMS24xx size 4MB in Ford vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **38 Module Ford Visteon ECC-VI EURO2**

This module is designed to to disable catalyst monitoring from engine control units Visteon ECC-VI in Ford vehicles. This module modifies the read file (full). All users follow up updates and technical support for free!

### **39 Module Ford Visteon EEC-VI EVAP OFF**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units Visteon EEC-VI in Ford vehicles. This module modifies the read files (full). All users follow up updates and technical support for free!

### **40 Module Ford Visteon ECC-V EURO2**

This module is designed to disable catalyst monitoring from engine control units Visteon ECC-V in Ford vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **41 Module Ford Visteon EEC-V EVAP OFF**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units Visteon EEC-V in Ford vehicles. This module modifies the read files (full). All users follow up updates and technical support for free!

### **42 Module Ford Visteon EEC-V EGR OFF**

This module is designed to disable EGR valve monitoring (Exhaust Gas Recirculation) from engine control units NGC3 MPC565 and NGC4 MPC5554 in Chrysler/Dodge/Jeep/Fiat vehicles. This module modifies the read file (full). All users follow up updates and technical support for free!

---

### **43 Module DPF OFF SID208 FORD**

This module is designed to disable the DPF control (diesel particulate filter) from the SID208 ECUs on FORD vehicles.

This module modifies the read file (full), with the recalculation of the checksum. Also, the ECU unlock function has been added to the module for further working via OBD. All users will receive subsequent updates and technical support for free!

### **44 Module DTC OFF SID208 FORD**

This module is designed to disable DTC OFF from the SID208 ECU on FORD vehicles. This module makes an adjustment of the read file (full), with the recalculation of the checksum.

Also, the ECU unlock function has been added to the module for further working via OBD. All users will receive subsequent updates and technical support for free!

### **45 Module EGR OFF SID208 FORD**

This module is designed to disable the EGR from the SID208 ECUs on FORD vehicles. This module makes an adjustment of the read file (full), with the recalculation of the checksum. Also, the ECU unlock function has been added to the module for further work on OBD. All users will receive subsequent updates and technical support for free!

### **46 Module CAT OFF FORD MG1CS015/16/17/18/19 8MB**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units MG1CS015/16/17/18/19 size 8 MB in Ford vehicles. This module modifies the read file (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **47 Module DTC OFF FORD MG1CS015/16/17/18/19 8MB**

This module is designed to remove any DTC OFF from engine control units MG1CS015/16/17/18/19 size 8 MB in Ford vehicles. This module modifies the read file (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **48 Module EVAP OFF FORD MG1CS015/16/17/18/19 8MB**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units MG1CS015/16/17/18/19 size 8 MB in Ford vehicles. This module modifies the read file (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **49 Module OPF/GPF/PPF OFF FORD MG1CS015/16/17/18/19 4/8MB**

This module is designed to disable OPF/GPF/PPF from engine control units MG1CS015/16/17/18/19 size 4/8 MB in Ford vehicles. This module modifies the read file (full), without the checksum recalculated. All users follow up updates and technical support for free!

---

## **50 Module FORD VISTEON ECC-VI DTC OFF**

The module is designed to disable any error from the Visteon EEC-VI engine control units of Ford vehicles. The module modifies the read processor files. All users subsequent updates and technical support for free!

---

## **HONDA (23)**

### **51 Module EGR OFF KEIHIN MPC5554 2MB HONDA**

This module is designed to disable monitoring EGR valve from engine control units KEIHIN MPC5554 (size 2 MB) in HONDA vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **52 Module CAT OFF KEIHIN MPC5554 2MB HONDA**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units KEIHIN MPC5554 (size 2 MB) in HONDA vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **53 Module EGR OFF KEIHIN MPC5566 3MB HONDA**

This module is designed to disable monitoring EGR valve from engine control units KEIHIN MPC5566 (size 3MB) in HONDA vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **54 Module CAT OFF KEIHIN MPC5566 3MB HONDA**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units KEIHIN MPC5566 (size 3 MB) in HONDA vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **55 Module EGR OFF CONTINENTAL MPC5554 2MB HONDA**

This module is designed to disable monitoring EGR valve from engine control units CONTINENTAL MPC5554 (size 2 MB) in HONDA vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **56 Module CAT OFF CONTINENTAL MPC5554 2MB HONDA**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units CONTINENTAL MPC5554 (size 2 MB) in HONDA vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

---

### **57 Module CAT OFF KEIHIN TC1782 2.5 MB HONDA**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units KEIHIN TC1782 2.5 MB in HONDA vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **58 Module EGR OFF HITACHI SH72543 HONDA**

This module is designed to disable monitoring EGR valve from engine control units HITACHI SH72543 in HONDA vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **59 Module CAT OFF HITACHI SH72543 HONDA**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units HITACHI SH72543 in HONDA vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **60 Module CAT OFF KEIHIN SH72543 HONDA**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units KEIHIN SH72543 in HONDA vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **61 Module CAT OFF KEIHIN SH7058 HONDA**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units KEIHIN SH7058 in HONDA vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **62 Module EGR OFF KEIHIN SH7058 HONDA**

This module is designed to disable monitoring EGR valve from engine control units KEIHIN SH7058 in HONDA vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **63 Module EGR OFF KEIHIN SH72543 HONDA**

This module is designed to disable monitoring EGR valve from engine control units KEIHIN SH72543 in HONDA vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **64 Module CAT OFF HITACHI SH7059 HONDA**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units HITACHI SH7059 in HONDA vehicles. This module modifies the read file (full), without the checksum recalculated. All users follow up updates and technical support for free!

---

### **65 Module EGR OFF HITACHI SH7059 HONDA**

This module is designed to disable EGR valve monitoring (Exhaust Gas Recirculation) from engine control units HITACHI SH7059 on Honda vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **66 Module CAT OFF MATSUSHITA SH72543 HONDA**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units MATSUSHITA SH72543 on Honda vehicles. This module modifies the read file (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **67 Module EGR OFF MATSUSHITA SH72543 HONDA**

This module is designed to disable EGR valve monitoring (Exhaust Gas Recirculation) from MATSUSHITA SH72543 on Honda vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **68 Module CAT OFF HITACHI MPC5554 HONDA**

This module is designed to disable the catalyst control (Euro 2) from the HITACHI MPC5554 engine control units of HONDA vehicles. This module modifies the read file (full), without recalculating the checksum. All users will receive subsequent updates and technical support for free!

### **69 Module CAT OFF HITACHI SH7058 HONDA**

This module is designed to disable the catalyst control (Euro 2, CAT OFF) from the HITACHI SH7058 engine control units of HONDA vehicles. This module modifies the read file (full), without recalculating the checksum. All users will receive subsequent updates and technical support for free!

### **70 Module EGR OFF HITACHI MPC5554 HONDA**

This module is designed to disable EGR valve control from HITACHI MPC5554 engine control units of HONDA vehicles. This module modifies the read file (full), without recalculating the checksum. All users will receive subsequent updates and technical support for free!

### **71 Module EGR OFF HITACHI SH7058 HONDA**

This module is designed to disable the EGR valve control from the HITACHI SH7058 engine control units of HONDA vehicles. This module modifies the read file (full), without recalculating the checksum. All users will receive subsequent updates and technical support for free!

### **72 Module EGR OFF KEIHIN SH72546 3.75MB HONDA**

This module is designed to disable EGR valve control from KEIHIN SH72546 engine control units of HONDA vehicles. This module performs correction of the read firmware (full), with recalculation of the checksum. Further updates and technical support are free of charge for all users!

---

### **73 Module CAT OFF KEIHIN SH72546 3.75MB HONDA**

This module is designed to disable catalytic converter control (Euro 2) from KEIHIN SH72546 engine control units of HONDA cars. This module performs correction of the read file (full), with recalculation of the checksum.

Further updates and technical support are free of charge for all users!

---

## **HYUNDAI / KIA (74)**

### **74 Module DPF OFF DENSO TDI SH72546 Hyundai Kia**

This module is designed to disable DPF monitoring (diesel particulate filter) from engine control units DENSO TDI SH72546 in Hyundai Kia vehicles. This module modifies the read file (full), with the checksum recalculated. All users follow up updates and technical support for free!

To get information about the supported files please [write us an email](#).

### **75 Module ADBLUE OFF DENSO TDI SH72546 Hyundai Kia**

This module is designed to disable AdBlue monitoring from engine control units DENSO TDI SH72546 in Hyundai Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

To get information about the supported files please [write us an email](#).

### **76 Module IMMO OFF EDC16C39 HYUNDAI KIA**

This module is designed to remove immobilizer data from engine control units EDC16C39 in Hyundai Kia vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **77 Module IMMO OFF SIM2K-250/251 HYUNDAI KIA**

This module is designed to remove immobilizer data from engine control units SIM2K-250/251 in Hyundai Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **78 Module IMMO OFF SIM2K-260 HYUNDAI KIA**

This module is designed to remove immobilizer data from engine control units SIM2K-260 in Hyundai Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

---

### **79 Module DTC OFF SIM2K-260 HYUNDAI KIA**

This module is designed to remove any DTC from engine control units SIM2K-260 Hyundai Kia cars. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **80 Module EVAP OFF SIM2K-260 HYUNDAI KIA**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units SIM2K-260 Hyundai Kia cars. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **81 Module CAT OFF SIM2K-260 HYUNDAI KIA**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units SIM2K-260 Hyundai Kia cars. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **82 Module CAT OFF SIM2K-250/251 HYUNDAI KIA**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units SIM2K-250/251 Hyundai Kia cars. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **83 Module EVAP OFF SIM2K-250/251 HYUNDAI KIA**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units SIM2K-250/251 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **84 Module DTC OFF SIM2K-250/251 HYUNDAI KIA**

This module is designed to remove any DTC from engine control units SIM2K-250/251 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **85 Module CAT OFF DELPHI MT86 Hyundai Kia**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units DELPHI MT86 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **86 Module EVAP OFF DELPHI MT86 Hyundai Kia**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units DELPHI MT86 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

---

### **87 Module DTC OFF DELPHI MT86 Hyundai Kia**

This module is designed to remove any DTC from engine control units DELPHI MT86 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **88 Module Immo OFF Delphi MT38 (K-line, CAN) Hyundai Kia**

This module is designed to remove immobilizer data from engine control units Delphi MT38 (ECU K-line and CAN) in Hyundai and Kia vehicles. This module modifies the read files (full or calibrated), without the checksum recalculated. All users follow up updates and technical support for free!

### **89 Module CAT OFF DELPHI MT38 Hyundai Kia**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units DELPHI MT38 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **90 Module EVAP OFF DELPHI MT38 Hyundai Kia**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units DELPHI MT38 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **91 Module DTC OFF DELPHI MT38 Hyundai Kia**

This module is designed to remove any DTC from engine control units DELPHI MT38 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **92 Module IMMO OFF ME17.9.21 Hyundai Kia**

This module is designed to remove immobilizer data from engine control units ME17.9.21 in Hyundai and Kia vehicles. This module modifies the read files (full), without recalculating the checksum. All users follow up updates and technical support for free!

### **93 Module IMMO OFF ME(D)(DG)17.9.8 Hyundai Kia**

This module is designed to remove immobilizer data from engine control units ME(D)(DG)17.9.8 in Hyundai and Kia vehicles. This module modifies the read files (full), without recalculating the checksum. All users follow up updates and technical support for free!

### **94 Module Immo OFF M(G)7.9.8 Hyundai Kia**

This module is designed to remove immobilizer data from engine control units M(G)7.9.8 in Hyundai and Kia vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

---

### **95 Module Immo OFF ME17.9.11(12,13) Hyundai Kia**

This module is designed to remove immobilizer data from engine control units ME17.9.11(12,13) in Hyundai and Kia vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **96 Module Immo OFF M7.9.7 Hyundai Kia**

This module is designed to remove immobilizer data from engine control units M7.9.7 in Hyundai and Kia vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **97 Module IMMO OFF SIM2K-240/241/242/245 HYUNDAI KIA**

This module is designed to remove immobilizer data from engine control units SIM2K-240/241/242/245 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **98 Module CAT OFF SIM2K-240/241/242/245 Hyundai Kia**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units SIM2K-240/241/242/245 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **99 Module EVAP OFF SIM2K-240/241/242/245 Hyundai Kia**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units SIM2K-240/241/242/245 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **100 Module DTC OFF SIM2K-240/241/242/245 Hyundai Kia**

This module is designed to remove any DTC from engine control units SIM2K-240/241/242/245 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **101 Module Immo OFF SIM2K-140/141/341 Hyundai Kia**

This module is designed to remove immobilizer data from engine control units SIM2K-140/141/341 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **102 Module CAT OFF SIM2K-140/141/341 Hyundai Kia**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units SIM2K-140/141/341 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

---

### **103 Module EVAP OFF SIM2K-140/141/341 Hyundai Kia**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units SIM2K-140/141/341 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **104 Module DTC OFF SIM2K-140/141/341 Hyundai Kia**

This module is designed to remove any DTC from engine control units SIM2K-140/141/341 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **105 Module CAT OFF SIM2K-D160 Hyundai Kia**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units SIM2K-D160 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **106 EGR OFF SIM2K-D160 Hyundai Kia**

This module is designed to disable EGR valve monitoring (Exhaust Gas Recirculation) from engine control units SIM2K-D160 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **107 Module EVAP OFF SIM2K-D160 Hyundai Kia**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units SIM2K-D160 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **108 Module DTC OFF SIM2K-D160 Hyundai Kia**

This module is designed to remove any DTC from engine control units SIM2K-D160 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **109 Module PATCH P0605 SIM2K-D160 Hyundai Kia**

This module is designed to remove DTC P0605 from engine control units SIM2K-D160 in Hyundai and Kia vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **110 Module IMMO OFF DELPHI MT86 HYUNDAI KIA**

This module is designed to disable the immobilizer from the DELPHI MT86 engine control units of Hyundai Kia vehicles. This module modifies the read file (full), with the recalculation of the checksum. For all users, further updates and technical support are free!

### **111 Module CAT OFF ME(D)(DG)17.9.8**

This module is designed to disable catalyst monitoring in the engine control units ME(D)(DG) 17.9.8 of Hyundai Kia vehicles. This module modifies the read file, without the recalculation of the checksum. For all users, further updates and technical support are free!

## **112 Module ADBLUE (SCR) OFF MD1CS012 TDI HYUNDAI KIA**

This module is designed to disable AdBlue (SCR) from engine control units BOSCH MD1CS012 TDI on Hyundai and Kia vehicles. This module modifies the read file (full), without the checksum recalculated. All users follow up updates and technical support for free!

## **113 Module DPF OFF MD1CS012 TDI HYUNDAI KIA**

This module is designed to disable DPF monitoring (diesel particulate filter) from engine control units BOSCH MD1CS012 TDI on Hyundai and Kia vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

## **114 Module DTC OFF MD1CS012 TDI HYUNDAI KIA**

This module is designed to remove any DTC from engine control units DENSO TDI SH72546 on Hyundai and Kia vehicles. This module modifies the read file (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **115 Module EGR OFF MD1CS012 TDI HYUNDAI KIA**

This module is designed to disable EGR from engine control units BOSCH MD1CS012 TDI on Hyundai and Kia vehicles. This module modifies the read file (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **116 Module READINESS OFF MD1CS012 TDI HYUNDAI KIA**

This module is designed to disable Readiness Code from engine control units BOSCH MD1CS012 TDI on Hyundai and Kia vehicles. This module modifies the read file (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **117 Module SPEED LIMITER OFF ECU EDC17C57 KIA HYUNDAI**

The module is designed to disable the speed limiter from the EDC17C57 engine control units of the Kia and Hyundai vehicles. The module corrects the read firmware of the processor, without recalculating the checksum. All users follow up updates and technical support for free!

### **118 Module CAT OFF CPEGD2/CDGDSH2 Hyundai Kia**

This module is designed to disable catalyst monitoring in the engine control units CPEGD2/CDGDSH2 of Hyundai and Kia vehicles. This module modifies the read file, with the recalculation of the checksum. For all users, further updates and technical support are free!

### **119 Module DTC OFF CPEGD2/CDGDSH2 Hyundai Kia**

This module is designed to disable any DTC in the engine control units CPEGD2/CDGDSH2 of Hyundai and Kia vehicles. This module modifies the read file, with the recalculation of the checksum. For all users, further updates and technical support are free!

## **120 Module VIN CHANGE ME(D)(DG)17.9.8 Hyundai Kia**

This module is designed to change the VIN code in DFlash in the engine control units ME(D) (DG) 17.9.8 of Hyundai and Kia vehicles. This module modifies the read file (DFlash, 64 kB), with the recalculation of the checksum. For all users, further updates and technical support are free!

## **121 Module CHANGE VIN ME17.9.21 HYUNDAI KIA**

This module is designed to change the VIN code in DFlash in the engine control units ME17.9.21 of Hyundai and Kia vehicles. This module modifies the read file (DFlash, 64 kB), with the recalculation of the checksum. For all users, further updates and technical support are free!

## **122 Module EGR OFF DENSO TDI SH72546 HYUNDAI KIA**

This module is designed to disable EGR valve monitoring (Exhaust Gas Recirculation) from engine control units DENSO TDI SH72546 Hyundai Kia cars. This module corrects the read firmware (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **123 Module IMMO OFF DCM3.7 KIA HYUNDAI**

This module is designed to remove immobilizer data from engine control units DCM3.7 in Kia and Hyundai vehicles. The module recalculates the checksum via OBD. All users follow up updates and technical support for free!

### **124 Module DTC OFF EDC17 KIA HYUNDAI**

This module is designed to disable any DTC from the engine control units EDC17 in Kia and Hyundai vehicles. This module supports the following ECUs: EDC17CP14, EDC17C08, EDC17C53, EDC17C57. The module supports modifying the TRICORE processor files without the checksum recalculation. All users follow up updates and technical support for free!

---

## **125 Module EGR OFF EDC17 KIA HYUNDAI**

This module is designed to disable EGR valve monitoring (Exhaust Gas Recirculation) from engine control units EDC17 in Kia and Hyundai vehicles. The module supports the following ECUs: EDC17CP14, EDC17C08, EDC17C53, EDC17C57. The module supports modifying the TRICORE processor files without the checksum recalculation.

After writing the modified file, the plug from EGR valve can be removed if you physically block the air flow entirely.

All users follow up updates and technical support for free!

## **126 Module CAT OFF ME17.9.11(12,13) Hyundai Kia**

This module is designed to disable catalyst monitoring in the engine control units ME17.9.11(12,13) of Hyundai and Kia vehicles. This module modifies the read file, without the recalculation of the checksum. For all users, further updates and technical support are free!

## **127 Module DPF/FAP OFF EDC17 KIA HYUNDAI**

This module is designed to disable the DPF control (diesel particulate filter) from the EDC17 ECUs on Kia and Hyundai vehicles. The supported ECUs: EDC17CP14, EDC17C08, EDC17C53, EDC17C57

This module modifies the read file from the TRICORE processor, without the recalculation of the checksum. After writing the modified file, the DPF can be removed or deleted. All users will receive subsequent updates and technical support for free!

## **128 Module Immo OFF DENSO TDI SH72546 Hyundai Kia**

This module is designed to remove immobilizer data from engine control units DENSO TDI SH725461 Hyundai Kia vehicles.

This module corrects the read firmware (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **129 MODULE IMMO OFF M7.9.7/MG7.9.7 HYUNDAI\_KIA**

This module is designed to remove immobilizer data from the M7.9.7 engine control units with a size of 512kb and MG7.9.7 with a size of 1024kb of Hyundai Kia cars. This module corrects the read firmware (full or calibration), with the recalculation of the checksum. All users will receive subsequent updates and technical support for free!

### **130 Module CAT OFF ME17.9.21 Hyundai Kia**

This module is designed to disable catalyst monitoring in the engine control units ME17.9.21 of Hyundai Kia vehicles. This module modifies the read file, without the recalculation of the checksum. For all users, further updates and technical support are free!

### **131 Module DPF OFF ECU DCM 3.7 KIA HYUNDAI**

The module is designed to disable DPF / FAP (Diesel Particulate Filter) from DCM 3.7 engine control units of Kia and Hyundai vehicles. The module modifies the read file of the processor, without recalculating the checksum. All users follow up updates and technical support for free!

## 132 Module DTC OFF DENSO TDI SH72546 Hyundai Kia

This module is designed to remove any DTC from engine control units DENSO TDI SH72546 Hyundai Kia vehicles. This module modifies the read file (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **133 Module DTC OFF ECU DCM 3.7 KIA HYUNDAI**

The module is designed to delete any DTC from DCM 3.7 engine control units of Kia and Hyundai vehicles. The module modifies the read file of the processor, without recalculating the checksum. All users follow up updates and technical support for free!

### **134 Module DTC OFF ME(D)(DG)17.9.8 Hyundai Kia**

This module is designed to disable any DTC in the engine control units ME(D)(DG) 17.9.8 of Hyundai Kia vehicles. This module modifies the read file, without the recalculation of the checksum. For all users, further updates and technical support are free!

### **135 Module DTC OFF ME17.9.11(12,13) Hyundai Kia**

This module is designed to disable any DTC in the engine control units ME17.9.11(12,13) of Hyundai Kia vehicle. This module modifies the read file, without the recalculation of the checksum. For all users, further updates and technical support are free!

### **136 Module DTC OFF ME17.9.21 Hyundai Kia**

This module is designed to disable any DTC in the engine control units ME17.9.21 of Hyundai Kia vehicles. This module modifies the read file, without the recalculation of the checksum. For all users, further updates and technical support are free!

### **137 Module EGR OFF ECU DCM 3.7 Kia Hyundai**

The module is designed to disable EGR valve from DCM 3.7 engine control units of Kia and Hyundai vehicles. The module modifies the read file of the processor, without recalculating the checksum. All users follow up updates and technical support for free!

### **138 Module EVAP OFF ME(D)(DG)17.9.8 Hyundai Kia**

This module is designed to disable EVAP in the engine control units ME(D)(DG) 17.9.8 of Hyundai Kia vehicles. This module modifies the read file, without the recalculation of the checksum. For all users, further updates and technical support are free!

### **139 Module EVAP OFF ME17.9.11(12,13) Hyundai Kia**

This module is designed to disable EVAP in the engine control units ME17.9.11(12,13) of Hyundai Kia vehicles. This module modifies the read file, without the recalculation of the checksum. For all users, further updates and technical support are free!

### **140 Module EVAP OFF ME17.9.21 Hyundai Kia**

This module is designed to disable EVAP in the engine control units ME17.9.21 of Hyundai Kia vehicles. This module modifies the read file, without the recalculation of the checksum. For all users, further updates and technical support are free!

### **141 Module SCR OFF (ADBLUE) TDI EDC17C57 HYUNDAI KIA**

This module is designed to disable AdBlue control from the EDC17C57 TDI engine control units of Hyundai Kia vehicles. This module modifies the read files (full or calibration), without recalculating the checksum.

### **142 Module SCR OFF (ADBLUE) TDI EDC17CP62 HYUNDAI KIA**

This module is designed to control the perception of AdBlue from the EDC17CP62 TDI engine control units of Hyundai Kia vehicle. This module modifies the read file (full or estimated), without recalculating the checksum.

### **143 Module Speed limiter OFF DENSO TDI SH72546 Hyundai Kia**

This module is designed to remove speed limiter from engine control units DENSO TDI SH72546 Hyundai Kia cars. This module modified the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

#### **144 Module SPEED LIMITER OFF ECU DCM 3.7 Kia Hyunda**

The module is designed to disable the speed limiter from the DCM 3.7 engine control units of Kia and Hyundai vehicles. The module modified the read processor files without recalculating the checksum. All users subsequent updates and technical support for free!

#### **145 Module SPEED LIMITER OFF ECU SIM2K-142 KIA HYUNDAI**

The module is designed to disable the speed limiter from the SIM2K-142 engine control units of Kia and Hyundai vehicles. The module modifies the read processor files, with the recalculation of the checksum. All users subsequent updates and technical support for free!

#### **146 Module IMMO OFF M7.9.8/MG7.9.8 HYUNDAI KIA**

This module is designed to remove immobilizer data from the M7.9.8/MG7.9.8 engine control units.9.8 Hyundai Kia vehicles. This module corrects the read fiel (full or calibration), with the recalculation of the checksum. All users will receive subsequent updates and technical support for free!

#### **147 Module IMMO OFF MD1CS012 TDI HYUNDAI KIA**

This module is designed to remove immobilizer data from BOSCH MD1CS012 TDI engine control units of Hyundai Kia cars. This module modifies the read file (full), without recalculating the checksum. Further updates and technical support are free of charge for all users!

# TOYOTA (39)

## 148 Module ADBLUE OFF FULL DENSO TOYOTA LEXUS

The module is designed to disable the system AdBlue of the DENSO engine control units of the TOYOTA and LEXUS vehicles. The module modifies the read files of the NEC 76F00XX processor with checksum adjustment (if there is an active license for the [checksum recalculation module](#)). All users follow-up updates and technical support for free!

## 149 Module SAP OFF FULL DENSO TOYOTA LEXUS

The module is designed to completely disable the catalyst purge pump and both valves of the SAP system (SAP — secondary air pump) (connectors can be removed from the valves), as well as the SAP controller itself, of the DENSO engine control units of the TOYOTA and LEXUS vehicles. The module modifies the read files of the NEC 7F00XX processor with checksum and CVN adjustment (if there is an active license for the [checksum recalculation module](#)). All users follow-up updates and technical support for free!

## 150 Module 2ZR-FAE VALVEMATIC OFF FULL DENSO TOYOTA LEXUS

The module is designed to disable the valve control system ( VALVEMATIC ), installed on the engine 2ZR-FAE, of the DENSO engine control units of the TOYOTA and LEXUS vehicles. The module modifies the read files of the NEC 76F00XX processor with checksum adjustment (if there is an active license for the [checksum recalculation module](#)). All users follow-up updates and technical support for free!

## 151 Module Speed Limiter OFF DENSO PETROL GEN2 TOYOTA LEXUS

The module is designed to disable the speed limiter from the DENSO PETROL GEN 2 engine control units of TOYOTA and LEXUS vehicles. The module modifies the read file of the processor 76F0196/198/199/219 P5-CAN-bus with checksum correction (if there is an active license for the [checksum recalculation module](#)). All users follow-up updates and technical support for free!

## 152 Module CHECKSUM CVN DENSO TOYOTA LEXUS

The module is designed to perform checksum corrections and CVN (Calibration Verification Number) of the DENSO and DELPHI engine control units of the TOYOTA and LEXUS vehicles.

The module supports checksum corrections in the following ECUs:

1. Toyota, Lexus, Scion, Hino with Denso и Delphi GEN1 ECUs equipped with NEC 76F0004/15/23/38/39/40/70/85 и Motorola MPC565.
2. Toyota, Lexus with Denso GEN2 (newGEN) ECUs.  
File size: 192kb, 256kb, 320kb, 368kb, 384kb, 496kb, 736kb, 992kb, 1024kb, 1280kb, 1536kb, 2048kb.

The module supports CVN recalculations in the following ECUs:

1. Toyota, Lexus, Scion, Hino with Denso GEN1 ECUs equipped with NEC 76F0038/39/40/70/85.
2. Toyota, Lexus with Denso GEN2 (newGEN) ECUs.

### **153 Module DPF OFF FULL DENSO TDI TOYOTA LEXUS**

The module is designed to completely deactivate (physically remove) the diesel particulate filter (DPF) WITHOUT EMERGENCY TRANSMISSION MODE from the DENSO TDI engine control units of the TOYOTA and LEXUS vehicles. The module supports the following vehicles:

- GEN1 (only CAN ECU)
- GEN2

The module modifies the read files of the NEC 76F00XX processor with the checksum correction (if there is an active license of the [checksum recalculation module](#)). All users of this script follow updates and technical support for free!

### **154 Module EVAP OFF DENSO PETROL GEN3 TOYOTA LEXUS**

This module is designed to disable EVAP monitoring (evaporative emission control system) from the engine control units DENSO GEN3 PETROL of Toyota and Lexus. This module modifies the read files (full), without the checksum recalculation. The module supports the following ECU: TOYOTA DENSO GEN3 PETROL with the R7F701202 with file size 4Mb. All users follow up updates and technical support for free!

### **155 Module CAT OFF DENSO GEN3 TOYOTA LEXUS**

This module is designed to disable catalyst control (Euro 2) from the engine control units DENSO GEN3 PETROL in Toyota and Lexus. This module modifies the read files (full), without the checksum recalculation. The module supports the following ECU: TOYOTA DENSO GEN3 PETROL with the R7F701202 processor with the file size 4Mb. All users follow up updates and technical support for free!

### **156 Module EGR OFF FULL DENSO PETROL TOYOTA LEXUS**

The module is designed to completely deactivate (physically remove) the EGR valve WITHOUT EMERGENCY TRANSMISSION MODE from the DENSO PETROL engine control units of the TOYOTA and LEXUS vehicles. The module supports the following vehicles:

- GEN1 (only CAN ECU)

The module modifies the read files of the NEC 76F00XX processor with the checksum correction (if there is an active license of the [checksum recalculation module](#)). All users of this script follow updates and technical support for free!

### **157 Module CHS OFF FULL DENSO PETROL TOYOTA LEXUS**

The module is designed to completely deactivate (physically remove) CHS (coolant heat storage) from the DENSO PETROL engine control units of the TOYOTA and LEXUS vehicles. The module supports the following vehicles:

- GEN1 (only CAN ECU)

The module modifies the read files of the NEC 76F00XX processor with the checksum correction (if there is an active license of the [checksum recalculation module](#)). All users follow-up updates and technical support for free!

---

### **158 Module DPF OFF DENSO GEN3 TDI TOYOTA LEXUS**

The module is designed to completely deactivate (physically remove) the diesel particulate filter (DPF) WITHOUT EMERGENCY TRANSMISSION MODE from the DENSO TDI engine control units of the TOYOTA and LEXUS vehicles without the checksum correction. All users of this script follow updates and technical support for free!

### **159 Module ADBLUE OFF DENSO GEN3 TOYOTA LEXUS**

The module is designed to disable the system AdBlue of the DENSO GEN3 TDI engine control units of the TOYOTA and LEXUS vehicles without the checksum correction. All users follow-up updates and technical support for free!

### **160 Module EGR OFF DENSO GEN3 TDI TOYOTA LEXUS**

The module is designed to completely deactivate (physically remove) the EGR valve WITHOUT EMERGENCY TRANSMISSION MODE from the DENSO GEN3 TDI engine control units of the TOYOTA and LEXUS vehicles without the checksum correction. All users of this script follow updates and technical support for free!

### **161 Module 3ZR-FAE VALVEMATIC OFF FULL DENSO TOYOTA LEXUS**

The module is designed to disable the valve control system (VALVEMATIC), installed on the engine 3ZR-FAE, of the DENSO engine control units of the TOYOTA and LEXUS vehicles. The module modifies the read files of the NEC 76F00XX processor with checksum adjustment (if there is an active license for the [checksum recalculation module](#)). All users follow-up updates and technical support for free!

### **162 Module EGR OFF FULL DENSO TDI TOYOTA LEXUS**

The module is designed to completely deactivate (physically remove) the EGR valve WITHOUT EMERGENCY TRANSMISSION MODE from the DENSO TDI engine control units of the TOYOTA and LEXUS vehicles. The module supports the following vehicles:

- GEN1 (only CAN ECU)
- GEN2

The module corrects the read firmware of the NEC 76F00XX processor with the checksum correction (if there is an active license of the [checksum recalculation module](#)). All users of this script follow updates and technical support for free!

### **163 Module EGR OFF FULL DENSO TDI TOYOTA LEXUS - Discount**

For the owners of module EGR OFF CLOSE DENSO TDI TOYOTA LEXUS

### **164 Module CAT OFF DENSO GEN2 TOYOTA LEXUS**

This module is designed to disable catalyst control (Euro 2) from the engine control units DENSO GEN2 PETROL in Toyota and Lexus. This module modifies the read files (full), with the checksum recalculation (if there is an active license of the [checksum recalculation module](#)). The module supports the following ECUs: TOYOTA DENSO GEN2 PETROL on processors D76F0196, D76F0199, D76F0219 with the file size of 1280kb, 1536kb, 2048kb. All users follow up updates and technical support for free!

---

### **165 Module EGR OFF DENSO GEN2 TOYOTA LEXUS**

This module is designed to disable valve EGR monitoring from the engine control units DENSO GEN2 PETROL in Toyota and Lexus. This module modifies the read files (full), with the checksum recalculation (if there is an active license of the [checksum recalculation module](#)). The module supports the following ECUs: TOYOTA DENSO GEN2 PETROL on processors D76F0196, D76F0199, D76F0219 with firmware size of 1280kb, 1536kb, 2048kb. All users follow up updates and technical support for free!

### **166 Module EVAP OFF DENSO GEN2 TOYOTA LEXUS**

This module is designed to disable EVAP monitoring (evaporative emission control system) from the engine control units DENSO GEN2 PETROL in Toyota and Lexus. This module modifies the read files (full), with the checksum recalculation (if there is an active license of the [checksum recalculation module](#)). The module supports the following ECUs: TOYOTA DENSO GEN2 PETROL with the processors D76F0196, D76F0199, D76F0219 with file size of 1280kb, 1536kb, 2048kb. All users follow up updates and technical support for free!

### **167 Module DTC OFF DENSO GEN2 TOYOTA LEXUS**

This module is designed to disable any DTC from the engine control units DENSO GEN2 PETROL in Toyota and Lexus. This module modifies the read files (full), with the checksum recalculation (if there is an active license of the [checksum recalculation module](#)). The module supports the following ECUs: TOYOTA DENSO GEN2 PETROL on processors D76F0196, D76F0199, D76F0219 with the file size 1280kb, 1536kb, 2048kb. All users follow up updates and technical support for free!

### **168 Module CAT OFF DELPHI MPC TOYOTA LEXUS**

This module is designed to disable catalyst control (Euro 2) from the engine control units DELPHI MPC PETROL in Toyota and Lexus. This module modifies the read files (full), with the checksum recalculation (if there is an active license of the [checksum recalculation module](#)). The module supports the following ECUs: DELPHI MPC PETROL on processors D76F0196, MPC with the file size 1024kb, 1536kb, 2048kb. All users follow up updates and technical support for free!

### **169 Module EVAP OFF DELPHI MPC TOYOTA LEXUS**

This module is designed to disable EVAP monitoring (evaporative emission control system) from the engine control units DELPHI MPC PETROL in Toyota and Lexus. This module modifies the read files (full), with the checksum recalculation (if there is an active license of the [checksum recalculation module](#)). The module supports the following ECUs: TOYOTA DELPHI MPC PETROL on processors MPC with the file size 1024kb, 1536kb, 2048kb. All users follow up updates and technical support for free!

### **170 Module DTC OFF DELPHI MPC TOYOTA LEXUS**

This module is designed to disable any DTC from the engine control units DELPHI MPC PETROL in Toyota and Lexus. This module corrects the read firmware (full), with the checksum recalculation (if there is an active license of the [checksum recalculation module](#)). The module supports the following ECU: TOYOTA DELPHI MPC PETROL on processors MPC with the file size 1024kb, 1536kb, 2048kb. All users follow up updates and technical support for free!

---

### **171 Module CAT OFF DENSO TOYOTA LEXUS**

This module is designed to disable catalyst control (Euro 2) from the engine control units DENSO in Toyota and Lexus. This module modifies the read files (full), with the checksum recalculation (if there is an active license of the [checksum recalculation module](#)). The module supports the following ECUs: TOYOTA DENSO on processors NEC 7F00XX with the file size of 320kb, 368kb, 384kb, 496kb, 736kb, 992kb, 1536kb, 2048kb. All users follow up updates and technical support for free!

### **172 Module EGR DENSO TDI TOYOTA LEXUS**

This module is designed to disable valve EGR monitoring from the engine control units DENSO TDI in Toyota and Lexus. This module modifies the read files (full), with the checksum recalculation (if there is an active license of the [checksum recalculation module](#)). The module supports the following ECUs: DENSO TDI with processors NEC 7F00XX with firmware size of 320kb, 368kb, 384kb, 496kb, 736kb, 992kb, 1536kb, 2048kb. All users follow up updates and technical support for free!

### **173 Module AIR CAT DENSO TOYOTA LEXUS**

This module is designed to disable AIR CAT (Secondary air injection system) from the engine control units DENSO in Toyota and Lexus. This module modifies the read files (full), with the checksum recalculation (if there is an active license of the [checksum recalculation module](#)). The module supports the following ECUs: TOYOTA DENSO with the processor NEC 7F00XX with the file size of 320kb, 368kb, 384kb, 496kb, 736kb, 992kb, 1536kb, 2048kb. All users follow up updates and technical support for free!

### **174 Module EVAP DENSO TOYOTA LEXUS**

This module is designed to disable EVAP monitoring (evaporative emission control system) from the engine control units DENSO in Toyota and Lexus. This module modifies the read files (full), with the checksum recalculation (if there is an active license of the [checksum recalculation module](#)). The module supports the following ECUs: TOYOTA DENSO with the processor NEC 7F00XX with file size of 320kb, 368kb, 384kb, 496kb, 736kb, 992kb, 1536kb, 2048kb. All users follow up updates and technical support for free!

### **175 Module DPF/FAP DENSO TDI TOYOTA and LEXUS**

The module is designed to completely deactivate (physically remove) the diesel particulate filter (DPF) from the DENSO TDI engine control units of the TOYOTA and LEXUS. This module modifies the read files (full), with the checksum recalculation (if there is an active license of the [checksum recalculation module](#)). The module supports the following ECUs: TOYOTA DENSO on processors NEC 7F00XX with the file size of 736kb, 992kb, 1536kb, 2048kb. All users follow up updates and technical support for free!

### **176 Module DTC OFF DENSO TOYOTA LEXUS**

This module is designed to disable any DTC from the engine control units DENSO in Toyota and Lexus. This module modifies the read files (full), with the checksum recalculation (if there is an active license of the [checksum recalculation module](#)). The module supports the following ECU: TOYOTA DENSO on processors NEC 7F00XX with the file size 320kb, 368kb, 384kb, 496kb, 736kb, 992kb, 1536kb, 2048kb. All users follow up updates and technical support for free!

### **177 Module Decoder CUW to BIN**

The module is designed to decode official updates of Toyota CUW files (updates) into a binary format. Supports the following file formats: 320kb, 384kb, 768kb, 992kb, 1536kb, 2048kb. The CUW file checksum correction is present. File format selection is automatic.

### **178 Module SAP OFF E2 DENSO TOYOTA LEXUS**

The module is designed to completely disable the catalyst purge pump and both valves of the SAP system (SAP — secondary air pump) (connectors can be removed from the valves), as well as the SAP controller itself (EURO2), of the DENSO engine control units of the TOYOTA and LEXUS vehicles. The module modifies the read files of the NEC 7F00XX processor with checksum corrections (if there is an active license for the [checksum recalculation module](#)). All users follow-up updates and technical support for free!

### **179 Module Speed Limiter OFF DENSO TOYOTA LEXUS**

The module is designed to disable the speed limiter of the DENSO engine control units of the TOYOTA and LEXUS vehicles. The module modifies the read file of the NEC 7F00XX processor with checksum corrections (if there is an active license for the [checksum recalculation module](#)). The module supports the following ECU: TOYOTA DENSO with processors NEC 7F00XX with the file size 320kb, 368kb, 384kb, 496kb, 736kb, 992kb, 1536kb, 2048kb. All users follow up updates and technical support for free!

### **180 Module EGR OFF DENSO PETROL GEN3 TOYOTA LEXUS**

This module is designed to disable EGR from the engine control units DENSO GEN3 PETROL in Toyota and Lexus. This module modifies the read files (full), without the checksum recalculation. The module supports the following ECUs: TOYOTA DENSO GEN3 PETROL on processors R7F701202/R7F701216 with filesize 4Mb. All users follow up updates and technical support for free!

### **181 Module SPEED LIMITER OFF V-MAX DENSO TDI GEN3 TOYOTA LEXUS**

The module is designed to disable the Speed Limit OFF / Vmax DENSO TDI GEN3 engine control units of TOYOTA and LEXUS vehicles. The module modifies the read file of the processor R7F701202/R7F701216 without recalculating the checksum. All users will receive subsequent updates and technical support for free!

### **182 Module AIR GRILLE SHUTTER OFF DENSO GEN3 PETROL TOYOTA LEXUS**

The module is designed to disable the AIR GRILLE SHUTTER system from DENSO GEN3 PETROL R7F701202/R7F701216 engine control units of TOYOTA and LEXUS vehicles without recalculating the checksum. All users subsequent updates and technical support for free!

### **183 Module DPF OFF DENSO GEN3 TOYOTA LC300\_LEXUS LX500D\_F33AFTV**

The module is designed to completely disable (physically remove) the DPF particulate filter WITHOUT EMERGENCY TRANSMISSION MODE from DENSO R7F701202/R7F701216 GEN3 TDI engine control units of TOYOTA LC300 and LEXUS

LX500D vehicles with F33AFTV engine without recalculating the checksum. For all users of this script, subsequent updates and technical support are free!

### **184 Module EGR OFF DENSO GEN3 TOYOTA LC300\_Lexus LX500D\_F33AFTV**

The module is designed for complete disabling (physical removal) of the EGR valve WITHOUT EMERGENCY TRANSMISSION MODE from DENSO R7F701202/R7F701216 GEN3 TDI engine control units of TOYOTA LC300 and LEXUS LX500D vehicles with F33AFTV engine without recalculating the checksum. For all users of this script, subsequent updates and technical support are free!

### **185 Module LC200 4.5TD 1VDFTV TUN**

This module allows modifying the files of the ECU to increase power on Toyota LC200 vehicles with a 4.5TD 1VDFTV engine 2008 - 2014 onwards. Available in two varieties: 286 hp and 330 hp, and the EGR valve shutdown mode.

### **186 Module SPEED LIMITER OFF DENSO PETROL GEN3 TOYOTA LEXUS**

The module is designed to disable the speed limiter from DENSO PETROL GEN 3 engine control units of TOYOTA and LEXUS cars with M20A-FKS A25A-FKS engines. The module corrects the read file by R7F701202\_R7F701216 processor without checksum correction.

Further updates and technical support are free of charge for all users!

---

## **ISUZU (4)**

### **187 Module EGR OFF TRANSTRON TDI SH705X SH72544 ISUZU**

The module is designed to disable valve EGR from the TRANSTRON TDI engine control units of ISUZU vehicles. The module modifies the read files (full, programme + map) of the processor SH7058 / SH7059 / SH72544 with the correction of the checksum. All users of this script get subsequent updates and technical support for free!

### **188 Module DPF OFF TRANSTRON TDI SH705X SH72544 ISUZU**

The module is designed to disable the DPF particulate filter from the TRANSTRON TDI engine control units of ISUZU vehicles. The module modifies the read files of the processor (full, programme + map) SH7058 / SH7059 / SH72544 with the correction of the checksum. All users of this script get subsequent updates and technical support for free!

### **189 Set of modules: DPF OFF TRANSTRON TDI + EGR OFF TRANSTRON TDI**

DPF OFF TRANSTRON TDI SH705X SH72544 ISUZU + EGR OFF TRANSTRON TDI SH705X SH72544 ISUZU

### **190 Module DTC OFF TRANSTRON TDI SH705X SH72544 ISUZU**

The module is designed to disable any DTC from the TRANSTRON TDI engine control units of ISUZU vehicles. The module modifies the read files (full, programme + map) of the processor SH7058 / SH7059 / SH72544 with the correction of the checksum. All users of this script get subsequent updates and technical support for free!

## **MAZDA (19)**

### **191 Module CAT OFF MAZDA ECU Mitsubishi MH8106F EURO2**

This module is designed to disable catalyst monitoring from engine control units Mitsubishi MH8106F in Mazda vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **192 Module EGR OFF MAZDA SKYAKTIV ECU MITSUBISHI**

The module is designed to disable the EGR valve from the Mitsubishi engine control units of Mazda vehicles. The module modifies the read processor files. All users get subsequent updates and technical support for free!

### **193 Module CAT OFF MAZDA SKYAKTIV ECU MITSUBISHI EURO 2**

The module is designed to disable catalyst control (Euro 2) from the engine control units Mitsubishi in Mazda vehicles. The module modifies the read processor files. All users get subsequent updates and technical support for free!

### **194 Module EGR OFF MAZDA SKYAKTIV ECU DENSO**

The module is designed to disable the EGR valve from the Denso engine control units of Mazda vehicles. The module modifies the read processor files with recalculation of the checksum. All users get subsequent updates and technical support for free!

### **195 Module MAZDA SKYAKTIV ECU DENSO EURO 2**

The module is designed to disable catalyst control (Euro 2) from the engine control units Denso of Mazda vehicles. The module modifies the read processor files with recalculation of the checksum. All users subsequent updates and technical support for free!

### **196 Module MAZDA SKYAKTIV ECU DENSO GEN4 EGR OFF**

The module is designed to disable EGR OFF from the engine control units Denso of Mazda vehicles. The module modifies the read processor file with recalculation of the checksum. All users subsequent updates and technical support for free!

### **197 Module MAZDA SKYAKTIV ECU DENSO GEN4 EURO 2**

The module is designed to disable catalyst control (Euro 2) from the engine control units Denso of Mazda vehicles. The module modifies the read processor files with recalculation of the checksum. All users subsequent updates and technical support for free!

### **198 Module MAZDA SKYAKTIV ECU MITSUBISHI GEN4 EGR OFF**

The module is designed to disable EGR OFF from the engine control units Mitsubishi GEN4 of Mazda vehicles. The module modifies the read processor files. All users subsequent updates and technical support for free!

---

### **199 Module MAZDA SKYAKTIV ECU MITSUBISHI GEN4 EURO 2**

The module is designed to disable catalyst control (Euro 2) from the engine control units Mitsubishi GEN4 of Mazda vehicles. The module modifies the read processor files. All users subsequent updates and technical support for free!

### **200 Module MAZDA ECU Mitsubishi MH8106F EGR OFF**

The module is designed to disable the EGR valve from the Mitsubishi MH8106F engine control units of Mazda vehicles. The module modifies the read processor files. All users subsequent updates and technical support for free!

### **201 Module MAZDA ECU Mitsubishi MH8106F EVAP OFF**

The module is designed to disable EVAP control from Mitsubishi MH8106F engine control units of Mazda vehicles. The module modifies the read processor files. All users subsequent updates and technical support for free!

### **202 Module MAZDA SKYAKTIV ECU MITSUBISHI EURO 2**

The module is designed to disable catalyst control (Euro 2) from the engine control units Mitsubishi of Mazda vehicles. The module modifies the read processor file. All users subsequent updates and technical support for free!

### **203 Module MAZDA SKYAKTIV ECU MITSUBISHI EVAP OFF**

The module is designed to disable EVAP control from the Mitsubishi engine control units of Mazda vehicles. The module modifies the read processor file. All users get subsequent updates and technical support for free!

### **204 Module MAZDA SKYAKTIV ECU MITSUBISHI GEN4 EVAP OFF**

The module is designed to disable EVAP OFF from the engine control units Mitsubishi GEN4 of Mazda vehicles. The module modifies the read processor file. All users get subsequent updates and technical support for free!

### **205 Module MAZDA SKYAKTIV ECU MITSUBISHI EGR OFF**

The module is designed to disable the EGR valve from the Mitsubishi engine control units of Mazda vehicles. The module modifies the read processor file. All users get subsequent updates and technical support for free!

### **206 Module MAZDA SKYAKTIV ECU DENSO EVAP OFF**

The module is designed to disable EVAP control from the Denso engine control units of Mazda vehicles. The module modifies the read processor file with recalculation of the checksum. All users get subsequent updates and technical support for free!

### **207 Module MAZDA SKYAKTIV ECU DENSO EGR OFF**

The module is designed to disable the EGR valve from the Denso engine control units of Mazda vehicles. The module modifies the read processor file with recalculation of the checksum. All users subsequent updates and technical support for free!

---

### **208 Module MAZDA SKYAKTIV ECU DENSO GEN4 EVAP OFF**

The module is designed to disable EVAP OFF from the engine control units Denso of Mazda vehicle. The module modifies the read processor file with recalculation of the checksum. All users subsequent updates and technical support for free!

### **209 Module MAZDA ECU MITSUBISHI MH8106F EURO2**

The module is designed to disable catalyst control from Mitsubishi MH8106F engine control units of Mazda vehicles. The module modifies the read processor file. All users get subsequent updates and technical support for free!

---

## **mitsubishi (18)**

### **210 Module DPF OFF DENSO TDI SH7058/7059 MITSUBISHI**

This module is designed to disable DPF monitoring (diesel particulate filter) from engine control units DENSO TDI SH7058/7059 in Mitsubishi vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **211 Module CAT OFF MELCO CAN MH8104/8106/8115 MITSUBISHI**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units MELCO CAN MH8104/8106/8115 in MITSUBISHI vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **212 Module CAT OFF MELCO K-LINE MH7203/8206/8304/8305/8306 MITSUBISHI**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units MELCO K-LINE MH7203/8206/8304/8305/8306 in MITSUBISHI vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

**213 Discount Module CAT OFF MELCO CAN MH8104/8106/8115  
MITSUBISHI**

Module for the owners of [CAT OFF MELCO K-LINE](#)

**214 Discount Module CAT OFF MELCO K-LINE  
MH7203/8206/8304/8305/8306 MITSUBISHI**

Module for the owners of [CAT OFF MELCO CAN](#)

**215 Module EVAP OFF MELCO K-LINE MH7203/8206/8304/8305/8306  
MITSUBISHI**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units MELCO K-LINE MH7203/8206/8304/8305/8306 in MITSUBISHI vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

**216 Module EVAP OFF MELCO CAN MH8104/8106/8115 MITSUBISHI**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units MELCO CAN MH8104/8106/8115 in MITSUBISHI vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

MH7203/8206/8304/8305/8306 MITSUBISHI**

Module for owners of [EVAP OFF MELCO CAN](#)

**219 Module EGR OFF MELCO K-LINE MH7203/8206/8304/8305/8306  
MITSUBISHI**

This module is designed to disable EGR valve monitoring (Exhaust Gas Recirculation) from engine control units MELCO K-LINE MH7203/8206/8304/8305/8306 in MITSUBISHI vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

**220 Module EGR OFF MELCO CAN MH8104/8106/8115 MITSUBISHI**

This module is designed to disable EGR valve monitoring (Exhaust Gas Recirculation) from engine control units MELCO CAN MH8104/8106/8115 in MITSUBISHI vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

MH7203/8206/8304/8305/8306 MITSUBISHI**

Module for owners of [EGR OFF MELCO CAN](#)

## **222 Discount Module EGR OFF MELCO CAN MH8104/8106/8115**

### **MITSUBISHI**

Module for owners of **EGR OFF MELCO K-LINE**

## **223 Module DTC OFF MELCO CAN MH8104/8106/8115 MITSUBISHI**

This module is designed to disable any DTC from engine control units MELCO CAN MH8104/8106/8115 in MITSUBISHI vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

## **224 Module DTC OFF MELCO K-LINE MH7203/8206/8304/8305/8306**

### **MITSUBISHI**

This module is designed to disable any DTC from engine control units MELCO K-LINE MH7203/8206/8304/8305/8306 in MITSUBISHI vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

## **225 Module DTC OFF DENSO TDI SH7058/7059 MITSUBISHI**

This module is designed to remove any DTC from engine control units DENSO TDI SH7058/7059 in Mitsubishi vehicles. This module modifies the read file (full), with the checksum recalculated. All users follow up updates and technical support for free!

## **226 Module EGR OFF DENSO TDI SH7058/7059 MITSUBISHI**

This module is designed to disable EGR valve monitoring (Exhaust Gas Recirculation) from engine control units DENSO TDI SH7058/7059 in Mitsubishi vehicles. This module modifies the read file (full), with the checksum recalculated. All users follow up updates and technical support for free!

## **227 Module IMMO OFF DENSO TDI SH7058/7059 MITSUBISHI**

This module is designed to disable the immobilizer from the engine control units DENSO TDI SH7058/7059 Mitsubishi vehicles. This module modifies the read file (full), with the recalculation of the checksum. All users will receive subsequent updates and technical support for free!

---

## **NISSAN INFINITI (12)**

## **228 Module EVAP OFF HITACHI SH70XX NISSAN INFINITI**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units HITACHI SH7055/7058/7059 in NISSAN INFINITI vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

## **229 MODULE IMMO OFF HITACHI SH705X NISSAN INFINITI**

This module is designed to disable IMMO from engine control units HITACHI in NISSAN INIFINITI vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

List of supported processors:

- SH705415N
- SH705507N
- SH705513N
- SH705519N
- SH705520N
- SH705521N
- SH705828N
- SH705821N

### **230 Module DTC OFF HITACHI GEN2 SH72533 NISSAN INFINITI**

This module is designed to disable any DTC from engine control units HITACHI GEN2 SH72533 in NISSAN INIFINITI vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **231 Module EVAP OFF HITACHI GEN2 SH72533 NISSAN INFINITI**

This module is designed to disable EVAP monitoring (evaporative emission control system) from engine control units HITACHI GEN2 SH72533 in NISSAN INIFINITI vehicle. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **232 Module CAT OFF HITACHI GEN2 SH72533 NISSAN INFINITI**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units HITACHI GEN2 SH72533 in NISSAN INIFINITI vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **233 Module IMMO OFF HITACHI SH705524N SH705529N NISSAN ALMERA CLASSIC B10/Renault Samsung SM3**

This module is designed to disable IMMO from engine control units HITACHI NISSAN in NISSAN (Almera Classic B10, Renault Samsung SM3) vehicles. This module corrects the read firmware (full), without the checksum recalculated. All users follow up updates and technical support for free!

List of supported processors:

- SH705524N
- SH705529N

### **234 Module DTC OFF HITACHI GEN1 SH7055/7058/7059/72531/72533 NISSAN INFINITI**

This module is designed to disable any DTC from engine control units HITACHI GEN1 SH7055/7058/7059/72531/72533 NISSAN INFINITI cars. This module modifies the read file (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **235 Module CAT OFF HITACHI SH70XX NISSAN INFINITI**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units HITACHI SH7055/7058/7059 in NISSAN INFINITI vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **236 Module DPF OFF DENSO TDI SH7058/7059 NISSAN INFINITI**

This module is designed to disable DPF monitoring (diesel particulate filter) from engine control units DENSO TDI SH7058/7059 in Nissan Infiniti vehicles. This module modifies the read file (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **237 Module EGR OFF DENSO TDI SH7058/7059 Nissan Infiniti**

This module is designed to disable EGR valve monitoring (Exhaust Gas Recirculation) from engine control units DENSO TDI SH7058/7059 in Nissan Infiniti vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **238 Module DTC OFF DENSO TDI SH7058/7059 Nissan Infiniti**

This module is designed to remove any DTC from engine control units DENSO TDI SH7058/7059 in Nissan Infiniti vehicles. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **239 Module AIR GRILLE SHUTTER OFF HITACHI 1.25MB 2.0MB NISSAN INFINITI**

The module is designed to disable AIR GRILLE SHUTTER system from HITACHI engine control units of NISSAN and INFINITI cars without checksum recalculation. Further updates and technical support are free of charge for all users!

## **SSANG YONG (9)**

### **240 Module DCM3.7 CAN PATCH DTC P0619 SSANGYONG**

This module allows you to change the read or modified files from the DCM3.7 CAN engine control units of SSANGYONG vehicles, with subsequent writing and the disabling of the error "P0619 - alternative fuel ctrl mod ram / rom error" and emergency operation of the car. This module modifies the read files (read or

modified). The module supports working with 2MB files and 384kb calibrations. All users follow up updates and technical support for free!

### **241 Module EGR OFF DCM3.7 CAN SSANGYONG**

This module is designed to disable EGR valve monitoring from engine control units DCM3.7 CAN in SSANGYONG vehicles. The module supports the file size of 2mb and calibrations of 384kb. All users follow up updates and technical support for free!

### **242 Module DPF OFF DCM3.7 CAN SSANGYONG**

This module is designed to disable DPF/FAP monitoring (diesel particulate filter) from engine control units DCM3.7 CAN in SSANGYONG vehicles. The module supports the file size of 2mb and calibrations of 384kb. All users follow up updates and technical support for free!

### **243 Module DTC OFF DCM3.7 CAN SSANGYONG**

This module is designed to disable any DTC from engine control units DCM3.7 CAN in SSANGYONG vehicles. The module supports the file size of 2mb and calibrations of 384kb. All users follow up updates and technical support for free!

### **244 Module SCR OFF (AdBlue) DCM6.2 SSANGYONG**

This module is designed to disable SCR (AdBlue) control from DCM6.2 engine control units of SsangYong vehicles. This module corrects the read firmware (full or calibration) with a size of 4096kb, without recalculating the checksum. Subsequent updates and technical support are free for all users!

### **245 Module DTC OFF DCM6.2 SSANGYONG**

The module is designed to remove any DTC error from the DCM6.2 engine control units of SsangYong vehicles. This module corrects the read firmware (full or calibration) with a size of 3072kb or 4096kb, without recalculating the checksum. Subsequent updates and technical support are free for all users!

### **246 Module DPF OFF DCM6.2 SSANGYONG**

The module is designed to disable the DPF particulate filter from the DCM6.2 engine control units of SsangYong vehicles. This module corrects the read firmware (full or calibration) with a size of 3072kb or 4096kb, without recalculating the checksum. Subsequent updates and technical support are free for all users!

### **247 Module EGR OFF DCM6.2 SSANGYONG**

The module is designed to disable the EGR valve from the DCM6.2 engine control units of SsangYong vehicles. This module corrects the read firmware (full or calibration) with a size of 3072kb or 4096kb, without recalculating the checksum. Subsequent updates and technical support are free for all users!

### **248 Module SCR OFF (ADBLUE) TDI EDC17CP62 HYUNDAI KIA**

This module is designed to disable AdBlue (Urea) control from EDC17CP62 TDI engine control units of Hyundai Kia vehicles. This module makes adjustments to the read firmware (full or calibration), without recalculating the checksum. Subsequent updates and technical support are free for all users!

---

## **UAZ (1)**

### **249 Module IMMO OFF ME17.9.7(1) UAZ**

This module is designed to remove immobilizer data from engine control units ME17.9.7(1) in UAZ vehicles. This module modifies the read files (full or calibrated), without the checksum recalculated. All users follow up updates and technical support for free!

---

## **VAG GROUP (AUDI, VW, SKODA, SEAT) (5)**

### **250 Module EGR EDC17 VAG GROUP**

This module is designed to disable monitoring EGR valve from engine control units EDC17 in VAG group VW, Audi, Seat, Skoda vehicles. The module supports the following ECUs: EDC17U01, EDC17U05, EDC17CP04, EDC17CP14, EDC17CP20, EDC17CP24, EDC17CP44, EDC17C46, EDC17C54. This module modifies the read files from the TRICORE processor, without the checksum recalculated. After writing the modified file, the EGR connector can be removed or deleted while physically blocking the air flow. All users follow up updates and technical support for free!

### **251 Module DPF/FAP EDC17 VAG GROUP**

This module is designed to disable DPF/FAP monitoring (diesel particulate filter) from engine control units EDC17 in VAG group VW, Audi, Seat, Skoda vehicles. The module supports EDC17U01, EDC17U05, EDC17CP04, EDC17CP14, EDC17CP20, EDC17CP24, EDC17CP44, EDC17C46, EDC17C54 ECUs. This module modifies the read files from the TRICORE processor, without the checksum recalculated. After writing the modified file, the DPF can be removed or deleted. All users follow up updates and technical support for free!

### **252 Module IMMO OFF MED17 EDC17 VAG GROUP**

This module is designed to remove immobilizer data from engine control units MED17 and EDC17 in VAG group (VW, Audi, Seat, Skoda) vehicles. The module supports the following ECUs: EDC17U01, EDC17U05, EDC17CP04, EDC17CP14, EDC17CP20, EDC17CP24, EDC17CP44, EDC17C46, EDC17C54, MED17, MED17.1, MED17.5, MED17.5.1, MED17.5.5. This module modifies the files (full flash) read in

BOOT from TRICORE processor without the checksum recalculated. All users follow up updates and technical support for free!

### **253 Module DTC OFF EDC17 VAG GROUP**

The module is designed to remove any DTC from EDC17 engine control units of VAG group VW, Audi, Seat, Skoda vehicles. The module supports the following ECUs: EDC17U01, EDC17U05, EDC17CP04, EDC17CP14, EDC17CP20, EDC17CP24, EDC17CP44, EDC17C46, EDC17C54. The module modifies the file of the TRICORE processor, without recalculating the checksum. After writing the modified firmware to the ECU, the particulate filter can be knocked out, removed altogether! For all users, further updates and technical support are free!

### **254 Module READINESS OFF EDC17 VAG GROUP**

The module is designed to remove Readiness Code from EDC17 engine control units of VAG group VW, Audi, Seat, Skoda vehicles. The module supports the following ECUs: EDC17CP14, EDC17CP20, EDC17CP24, EDC17CP44, EDC17C46, EDC17C54, EDC17C64, EDC17C74. The module modifies the file of the TRICORE processor, without recalculating the checksum. After writing the modified firmware to the ECU, the particulate filter can be knocked out, removed altogether! For all users, further updates and technical support are free!

---

## **VOLVO (5)**

### **255 Module VOLVO VISTEON ESU-121/411/417 CAT OFF**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units VISTEON ESU-121/411/417 in VOLVO vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **256 Module VOLVO VISTEON ESU-121/411/417 DTC OFF**

This module is designed to disable any DTC from engine control units VISTEON ESU-121/411/417 in VOLVO vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **257 Module VOLVO VISTEON ESU-121/411/417 EGR OFF**

This module is designed to disable catalyst monitoring EGR valve from engine control units VISTEON ESU-121/411/417 in VOLVO vehicles. This module modifies the read files (full), without the checksum recalculated. All users follow up updates and technical support for free!

### **258 Module VOLVO VISTEON ESU-121/411/417 CHECKSUM**

This module is designed for calculate checksum engine control units VISTEON ESU-121/411/417 in VOLVO vehicles. All users follow up updates and technical support for free!

### **259 Discount Module VOLVO VISTEON ESU-121/411/417 CHECKSUM**

For owners of VOLVO VISTEON ESU-121/411/417 CAT OFF and VOLVO VISTEON ESU-121/411/417 EGR OFF

---

## **BOSCH MEDC17 EEPROM EDITOR: Modules (9)**

### **260 VAG: MED9.x Crypt**

Additional module for BOSCH MEDC17 EEPROM EDITOR

### **261 VAG: BCM2 A6/A7/A8/Touareg IMMO Data Manager**

Additional module for BOSCH MEDC17 EEPROM EDITOR

### **262 VAG: MEDC17 POWER CLASS / MARKEN CLASS**

Additional module for BOSCH MEDC17 EEPROM EDITOR

### **263 VAG: Simos 8.x (8.1, 8.2, 8.3, 8.4, 8.5, 8.6)**

Additional module for BOSCH MEDC17 EEPROM EDITOR

### **264 VAG: MQB Immo Data manager**

Additional module for BOSCH MEDC17 EEPROM EDITOR

### **265 VAG: Simos 1X.x (10, 12, 18)**

Additional module for BOSCH MEDC17 EEPROM EDITOR

### **266 VAG: TCU**

Additional module for BOSCH MEDC17 EEPROM EDITOR

### **267 VAG: ELV MQB**

Additional module for BOSCH MEDC17 EEPROM EDITOR

### **268 VAG: DELPHI DCM 3.7, 6.2**

Additional module for BOSCH MEDC17 EEPROM EDITOR

---

## **RENAULT (5)**

### **269 Module IMMO OFF EMS3120 RENAULT**

This module is designed to disable the immobilizer from the EMS3120 engine control units of RENAULT vehicles. This module modifies the read file (full), with the

recalculation of the checksum. When writing, you need the full version of the file. For all users, further updates and technical support are free!

### **270 Module IMMO OFF EMS3125 RENAULT**

This module is designed to disable the immobilizer from the EMS3125 engine control units of RENAULT vehicles. This module modifies the read file (full), with the recalculation of the checksum. When writing, you need the full version of the file. For all users, further updates and technical support are free!

### **271 Module IMMO OFF VALEO V40/42 RENAULT**

This module is designed to disable the immobilizer from the VALEO V40/42 engine control units of RENAULT vehicles. This module modifies the read file (full), with the recalculation of the checksum. When writing, you need the full version of the file. For all users, further updates and technical support are free!

### **272 Module DTC OFF EMS3125 RENAULT NISSAN**

This module is designed to remove any error (DTC) from the ECU EMS3125 of RENAULT NISSAN cars. This module corrects the read file, with the recalculation of the checksum!

All users will receive subsequent updates and technical support for free!

### **273 Module DTC OFF EMS3120 RENAULT NISSAN**

This module is designed to remove any error (DTC) from the ECU EMS3120 of RENAULT NISSAN cars. This module corrects the read file, with the recalculation of the checksum!

All users will receive subsequent updates and technical support for free!

## **SUBARU (15)**

### **274 Module CAT OFF HITACHI SH72543 2 MB SUBARU**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units HITACHI SH72533 2MB SUBARU cars. This module modifies the read file (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **275 Module DTC OFF HITACHI SH72543 2 MB SUBARU**

This module is designed to disable any DTC from engine control units HITACHI SH72533 2MB SUBARU cars. This module modifies the read file (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **276 Module EGR OFF HITACHI SH72543 2 MB SUBARU**

This module is designed to remove EGR valve from engine control units HITACHI SH72533 2 MB SUBARU cars. This module modifies the read file (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **277 Module EGR OFF HITACHI SH7059 1.5 MB SUBARU**

This module is designed to remove EGR valve from engine control units HITACHI SH7059 1.5 MB SUBARU cars. This module modifies the read file (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **278 Module CAT OFF HITACHI SH7059 1.5 MB SUBARU**

This module is designed to disable catalyst monitoring (Euro 2) from engine control units HITACHI SH7059 1.5 MB SUBARU cars. This module modifies the read file (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **279 Module DTC OFF HITACHI SH7059 1.5 MB SUBARU**

This module is designed to disable any DTC from engine control units HITACHI SH7059 1.5 MB SUBARU cars. This module modifies the read file (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **280 Module IMMO OFF DENSO SH7058 SUBARU**

This module is designed to disable the immobilizer from the DENSO SH7058 engine control units of Subaru vehicles. This module modifies the read file (full), with the recalculation of the checksum. For all users, further updates and technical support are free!

### **281 Module SUBARU EURO2 HITACHI SH7058 D25F4EAB 5C44307507**

The module is designed to disable catalyst monitoring from the engine control units HITACHI SH7058 with the identifier D25F4EAB 5C44307507 of Subaru vehicles. The module also performs tuning of the STAGE1 or STAGE2 files. All users follow up updates and technical support for free!

### **282 Module SUBARU EURO2 EGR OFF HITACHI SH7058 D25F4EMB 5C44387507**

The module is designed to disable the catalyst monitoring and EGR valve from the engine control units HITACHI SH7058 with the identifier D25F4EMB 5C44387507 of Subaru vehicles. All users follow up updates and technical support for free!

### **283 Module CAT OFF DENSO SH72531 1.25Mb SUBARU**

This module is designed to disable the catalyst control (Euro 2) from the Denso SH72531 1.25Mb engine control units of SUBARU vehicles. This module modifies the read files (full), with the recalculation of the checksum. All users subsequent updates and technical support for free!

### **284 Module DTC OFF DENSO SH72531 1.25Mb SUBARU**

This module is designed to disable any error (DTC) from the Denso SH72531 1.25Mb engine control units of SUBARU vehicles. This module modifies the read file (full), with the recalculation of the checksum. All users subsequent updates and technical support for free!

### **285 Module EGR OFF DENSO SH72531 1.25Mb SUBARU**

This module is designed to disable the EGR valve from Denso SH72531 1.25Mb engine control units for SUBARU vehicles. This module modifies the read files (full),

with the recalculation of the checksum. All users subsequent updates and technical support for free!

### **286 Module IMMO OFF DENSO SH72531 1.25MB SUBARU**

This module is designed to disable the immobilizer from the DENSO SH72531 petrol engine control units of Subaru vehicles. This module performs the correction of the read file (full), with the recalculation of the checksum. For all users, further updates and technical support are free!

### **287 Module CAT OFF DENSO SH7058 1MB SUBARU**

This module is designed to disable catalytic converter control (Euro 2) from Denso SH7058 1MB engine control units of SUBARU vehicles. This module modifies the read file (full), with recalculation of the checksum. Further updates and technical support are free of charge for all users!

### **288 Module DTC OFF DENSO SH7058 1MB SUBARU**

This module is designed to disable any error (DTC) from Denso SH7058 1MB engine control units of SUBARU vehicles. This module modifies of the read file (full), with recalculation of the checksum. Further updates and technical support are free of charge for all users!

---

## **SID309 (3)**

### **289 MODULE DPF OFF TDI SID309 (TC1767/2MB) NISSAN INFINITI**

This module is designed to disable DPF on SID309 (TC1767/2MB) TDI used in автомобилях Nissan Infiniti. This module modifies the read files (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **290 MODULE DTC OFF SID309 (TC1767/2MB) TDI NISSAN INFINITI**

This module is designed to disable any DTC from engine control units SID309 (TC1767/2MB) TDI used in Nissan Infiniti. This module modifies the read file (full), with the checksum recalculated. All users follow up updates and technical support for free!

### **291 MODULE EGR OFF TDI SID309 (TC1767/2MB) NISSAN INFINITI**

This module is designed to remove EGR from engine control units SID309 (TC1767/2MB) TDI used in Nissan Infiniti. This module modifies the read file (full), with the checksum recalculated. All users follow up updates and technical support for free!

---

## **BOSCH DCU17 (1)**

## **292 Module ADBLUE OFF DCU17 BOSCH**

This module is designed to disable the ADBLUE\_SCR OFF control from the ECU SCR BOSCH\_DCU17. This module modifies the read file (full). All users will receive subsequent updates and technical support for free!
